FTP & DATA SET UP PROCESS

Important note: the Enrollment will not be finished until the steps below are completed. Inventory and Sales files will need to be sent daily to enable the SiriusXM demo service as well as start the customer trials. You'll be sending the files to CDK Data Services for transmission to SiriusXM. To do this you'll be using FTP functionality. FTP allows you to transfer files between two computers on the Internet.

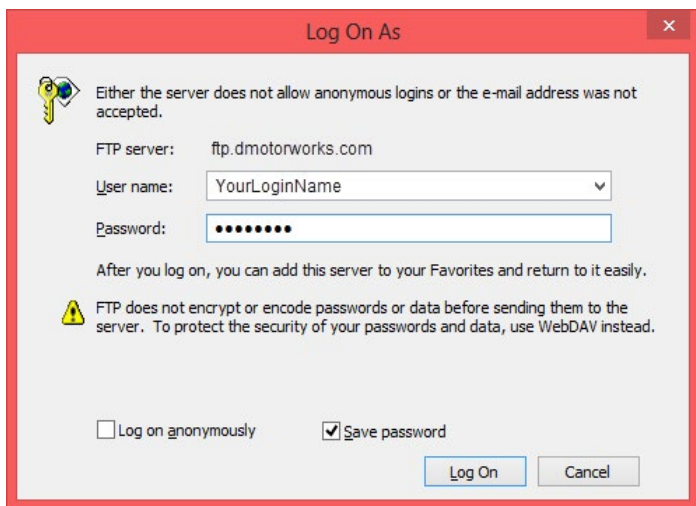

- Call CDK support at **855-857-6062** to obtain the FTP credentials that will be used to upload daily reports to ftp.dmotorworks.com.
- Build and send the required data (as described above) and push the data daily.
- Call CDK support at **855-857-6062** after your first FTP session so that CDK can confirm receipt and that the files meet the layout requirements.

CREATING THE CONNECTION

1. Start by opening Windows Explorer (not Internet Explorer) and type ftp.dmotorworks.com in the address bar.

2. Press Enter and a login dialog will appear.
3. Fill in the user name and password provided by CDK. To make subsequent logins faster and more automatic, you may wish to check the Save Password option. Then click Log On.

4. A standard Windows Explorer screen will open and you can drag the data files to the CDK FTP site.
5. When you are finished transferring files, close the window.
